Enza Zaden's new Eazy leaf varieties

Next Thursday, July 3rd, a limited group of leading European processing companies will visit the Enza Zaden UK facilities in Evesham to have a first look at the company's brand new Eazy leaf lettuce range. Eazy leaf is Enza Zaden's new lettuce type and can be used for:

1. The fresh processing industry
2. Whole head lettuce market
3. The upcoming triple lettuce market

Eazy leaf is characterized by its deeply serrated leaves, which makes it possible to harvest mechanically. This in combination with an excellent shelf life and eat ability. The taste and crispiness of the Eazy leaf varieties are a real advantage over the present material available in the market. Moreover, the new range of varieties have the most up to date Bremia and Nasanovia resistances included.

Enza Zaden will organise more Eazy leaf open days later this year in France, Germany and Spain. For more information, please contact Enza Zaden or send an email to eazyleaf@enzazaden.nl.
